If you are not satisfied with the installation of your refrigerator, please contact the store where you purchased it or call 1-800-944-9044 for assistance.

Please install your refrigerator at a site which will be level and strong enough to support the weight of the fully loaded refrigerator.

To avoid electric shock, which can cause death or severe personal injury, do not connect your refrigerator to an electrical power source until you have completed Step 2 of these instructions.

Do not run retaining straps over handles nor overtighten straps.

Load refrigerator from side of cabinet.

Floor should be level and table to support a fully loaded refrigerator.

Avoid direct sunlight and close proximity to a range,

DO NOT use a self-piercing type line to the refrigerator.

To avoid electric shock, which can cause death or severe personal injury, do not connect your refrigerator to an electrical power source until you have completed Step 2 of these instructions.

Keep all parts of your hands, fingers and hair away from the moving parts of the door and drawer mechanisms.

LEVELING FREEZER DRAWER (IF NECESSARY)

Do not make any horizontal cuts to the floor.

CAUTION

To avoid electric shock, which can cause death or severe personal injury, do not connect your refrigerator to an electrical power source until you have completed Step 2 of these instructions.

Avoid direct sunlight and close proximity to a range.

CAUTION

To avoid Property Damage:

Copper or Stainless Steel braided tubing is recommended for the water supply line. The use of plastic tubing is not recommended. Use of plastic tubing greatly increases the potential for water leaks, and the manufacturer will not be responsible for any damage if plastic tubing is used for the supply line.

Do not use expansion joint or compression fitting or use thread seal tape.
