1. Preparing For Installation

Be sure to coordinate site preparation and installation with your kitchen contractor. Include these minimum guidelines in your site preparation:

- Do not use an extension cord or an adapter plug.
- Avoid direct sunlight and close proximity to a range, dishwasher or other heat source.
- Choose a place near a grounded electrical outlet.
- Select a location where the refrigerator will be at least 2 ft (0.6 m) from the wall which can cause death by asphyxiation.
- Avoid direct sunlight and close proximity to a range, dishwasher or other heat source.
- Choose a place near a grounded electrical outlet.

2. Connect Water Supply

Before Installing The Water Supply Line, You Will Need:
- Basic tools: adjustable wrench, flat-blade screwdriver, and Phillips® screwdriver.
- 1/4"-bowd, copper or stainless steel tubing with pressure between 30 and 100 psi.
- A water supply line made of ½-inch (6 mm) OD, copper or stainless steel tubing. To determine the length of tubing needed, measure the distance from the ice maker inlet valve to where you will connect the line. Then add approximately 7 feet, as the refrigerator can be moved for cleaning if necessary.
- A shut-off valve to connect the water supply line to your household water system. DO NOT use a self-piercing type shut-off valve.
- A compression nut and ferrule (sleeve) for connecting a copper water supply line to the ice maker valve.

To avoid electric shock, which can cause death or serious personal injury, do not connect your refrigerator to an electrical power source until you have completed Step 2 of these instructions.

3. Level Refrigerator

Guidelines for final positioning of your refrigerator:

- All four corners of the cabinet must rest firmly on the floor.
- The sides should hit ¼ inch (6 mm) from front to back (to ensure that doors close and seal properly). Doors should align with eachother and be level. Most of these conditions can be met by raising or lowering the adjustable front rollers. To level the cabinet using the front rollers:
  1. You can raise or lower each door. Use a ¼ inch (6 mm) flat wrench to turn the adjustment screws (1 per side).

4. Installing & Leveling Freezer Drawer (if necessary)

A. Installing doors: Refer to “Installing Doors” in the Use & Care Guide.

B. Doors: First adjustment using the adjustable lower hinge (select models, if necessary):

   1. Open doors to 90 degrees.
   2. Lift the door while adjusting pin in lower door.
   3. To raise the door: rotate washer counterclockwise.
   4. To lower the door: rotate washer clockwise.

5. Installing & Adjusting Doors (if necessary)

A. Installing doors: Refer to “Installing Doors in the Use & Care Guide.”

B. Doors: Final adjustment using the adjustable lower hinge (select models, if necessary):

   1. Open doors to 90 degrees.
   2. Lift the door while adjusting pin in lower door.
   3. To raise the door: rotate washer counterclockwise.
   4. To lower the door: rotate washer clockwise.

6. Remove Internal Shipping Materials

Frigidaire uses packing foam and tape to secure the internal parts of your refrigerator for shipping. Once the refrigerator is in position, you can remove this material.

What’s Next?

- For important safety instructions and to learn how to operate your refrigerator, please read the entire Use & Care Guide.
- You may want to start with the “Normal Operating Sights & Sounds” section of the Guide to learn what to expect during typical operation.
- Please register your product. You can register online at www.frigidaire.com or you can simply send in the Registration Card.

7. Installation Check List

- Doors: handles are secure and tight.
- Door seals completely on cabinet on all sides.
- Fresh food doors are level.
- Ice Maker:
  - Refrigerator is level, side to side and tilted ¼ inch (6 mm) front to back.
  - Top of ice maker is above and at the same level as the top of the cabinet.
  - Cabinet is sitting solid on all corners.
  - House power turned on.
  - Refrigerator plugged in.

- Ice Maker:
  - House water supply connected to refrigerator.
  - No water leaks present at all connections.
  - Ice Maker is turned ON.

- Final Checks:
  - Shipping material removed.
  - Fresh Food and Freezer temperatures set.

If you are not satisfied with the installation of your refrigerator, please contact the store where you purchased it or call 1-800-944-9044 for assistance.
