- Grounding through neutral link prohibited in specific applications and certain locales, requiring use of 4-wire system. (For detailed electrical requirements, refer to Product Installation Guide on web.)
- Always consult local and national electric codes.
- Dryer installation requires 1" minimum installation clearance on each side of unit and 6" minimum at back. To achieve 6" minimum rear clearance, dryer MUST use 90° quick-turn vent elbow. Closet installation requires 2" minimum clearance between front of unit and vented door. Door MUST be vented with 120 sq. in. minimum louvered opening, equally divided, located 3" from top and bottom of door. A louvered door with equivalent air openings for full-length of door is acceptable. Air openings MUST remain unobstructed with door installed.
