SIGNATURE FEATURES

**Amazingly Fast**
Get amazingly fast heat with induction that boils water 50% faster than an electric cooktop.³

**Even Heat**
Whip up delicious meals with induction that delivers incredibly even heat across the surface of the pan so you get golden results every time.

**Easy To Clean**
Don’t stress over spills with induction’s easy-to-clean surface that generates heat only to your pan, not your cooktop, meaning spills can’t burn onto the surface.

**Auto Sizing™ Pan Detection**
Make fluffy pancakes with ease using Auto Sizing™ Pan Detection that automatically senses the size of your pan to only send heat to whatever small, medium, or large pan you are using.

MORE EASY-TO-USE FEATURES

**True Temperature Melt & Hold**
Get perfectly melted goodness with True Temperature Melt & Hold that delivers low, precise heat for melting delicate ingredients or sauces without scorching or burning for up to one hour.

**Temperature Precision**
Sear steaks, crisp sandwiches, melt chocolate, or simmer sauces with the precise temperature control of induction.

**Safe Surface**
The Safe Surface — Induction only heats pans and the food in them; the area around the pans stays cool to the touch.

**Energy Efficiency**
Since induction only heats your cookware and not your kitchen, less energy is lost throughout the cooking process.

**Cooktop Timer**
Use the built-in timer function to set a specified amount of time you want items to cook.

**Cookware Compatibility**
Most stainless steel and cast iron cookware is compatible with induction elements. An easy rule of thumb: if a magnet sticks to the bottom of the cookware, it’s induction-friendly.
