30" Induction

Product Dimensions
Height (Max.) 36-5/8"
Width 30"
Depth 28-5/16"

More Easy-To-Use Features

Smudge-Proof™ Stainless Steel
Resists fingerprints and is easy to clean.

Effortless™ Convection
Takes the guesswork out of convection cooking — our oven automatically adjusts standard baking temperatures to convection temperatures for consistent results.

One-Touch Options
Our ovens feature easy-to-use one touch buttons so you can keep foods warm — with the touch of a button.

One-Touch Keep Warm Setting
Just one touch of a button keeps food warm until everything — and everyone — is ready.

A.D.A Compliant
When properly installed, this model is A.D.A.-qualified based on the United States Access Board’s A.D.A./A.B.A. Accessibility Guidelines and the Department of Justice’s 2010 A.D.A. Standards for Accessible Design.

Sabbath Mode (Star-K® Certified)

Available in:
- Stainless (F)

Signature Features

Quick Preheat
Preheat in just a few minutes.1

True Convection
A single fan and third heating element circulates heat evenly for more even, quicker multi-rack baking.

Induction Cooktop
Get cooking faster with less than 2-minute boil time.2 Clean up easily with cool cooktop surface. Induction heats the pan, not the cooktop, so spills won’t burn on the surface. Adjust heat with greater accuracy than electric and gas cooktops especially at lower settings.

Quick Clean
Cleans easily with a 20-minute steam clean for light soil and 2-hour self-cleaning cycle.

When properly installed, this model is A.D.A.-qualified based on the United States Access Board’s A.D.A./A.B.A. Accessibility Guidelines and the Department of Justice’s 2010 A.D.A. Standards for Accessible Design.

1 Single phase, 3 or 4-wire cable, 120/240 or 120/208 Volt, 60 Hertz AC only.

2 Accessories information available on the web at frigidaire.com.
Slide-In Range Specifications

- Product Shipping Weight (approx.) - 240 Lbs.
- Single phase 3- or 4-wire cable, 120 / 240 or 120 / 208 Volt, 60 Hertz, fused on both sides of line with ground. (If local code permits, range may be connected by hard-wiring or by means of power supply cord kit.)
- Connected Load (kW Rating) @ 240 / 208 Volts = 14.5 / 10.9 kW
- Amps @ 240 / 208 Volts = 60.4 / 52.4 Amps
- Recommended Circuit Breaker - 40 Amps Minimum Circuit Required
- Always consult local and national electric codes.
- Make sure wall coverings around range can withstand heat generated by range.
- Linoleum or any other synthetic floor covering located beneath range, must be capable of withstanding minimum heat of 90°F above room temperature without shrinking, warping or discoloring. Insulating pad or 1/4”-thick plywood required between range and a carpeted floor.
- Countertop MUST be level in all directions and adjustable range height at least 1/16” greater than tallest cabinet height, to ensure metal rangetop flange will fit properly on countertop edge.
- When installing optional Backguard Kit, cutout depth of 21-3/4” minimum/22-1/8” maximum needs increased to 24”.
- Overhead cabinetry should not exceed a 13” maximum depth.
- Absolute minimum horizontal distance between overhead cabinets installed to either side of appliance must be no less than maximum width of appliance.
- Allow 24” minimum clearance between rangetop and bottom of cabinet when bottom of wood or metal cabinet is protected by not less than 1/4” flame-retardant millboard covered with not less than No. 28 MSG sheet steel, 0.015” stainless steel, 0.024” aluminum or 0.020” copper. Allow 30” minimum clearance when cabinet is unprotected.
- To reduce risk of fire when using overhead cabinetry, install range hood that projects horizontally a recommended minimum of 5” beyond bottom of cabinets.

Countertop Preparation

Rangetop’s side flanges overlap countertop cutout edges – for detailed preparation instructions, refer to product installation guide on the web.
- Flat Square-Finish Countertops – require no preparation since rangetop’s flange lays directly on countertop edge.
- Formed Front-Edged Countertops – require front molded edge to be shaved flat 3/4” from each front corner of opening.
- Tile Countertops – may need trim cut back 3/4” from each front corner of opening and/or rounded edge flattened.
- For existing cutout width greater than 30-1/16” reduce the 3/4” overlap dimension; for cutout width of 29”, replace actual side trim panels with smaller side trim panels, available with optional Side Trim Kit (refer to detailed kit installation instructions).

Optional Accessories

- Side Panel Kit: Stainless Steel – (PN # AO1529901).
- Backguard Kit: Stainless Steel – (PN # 903046-901S).
- Side Trim Kit: Stainless Steel – (PN # 903075-901S).
General Installation Guidelines
with Side-by-Side Refrigerator

Use these dimensions and clearance instructions for planning purposes only. For detailed installation instructions, refer to installation guide, packed with product, or on the web at frigidaire.com.

Specifications subject to change.
Use these dimensions and clearance instructions for planning purposes only. For detailed installation instructions, refer to installation guide, packed with product, or on the web at frigidaire.com.

When installing built-in cooking appliances in combination, 2” high minimum visible gap between appliance faceplates required.

Clearance information for cooking appliances, provided in specific product’s installation guide.

*When installing top mount refrigerator adjacent to wall, cabinet or other appliance that extends beyond front edge of unit, 20” minimum clearance recommended to allow for optimum 140° door swing, providing complete crisper access and removal. (Absolute 3” minimum clearance will only allow for 90° door swing which will provide limited crisper access with restricted removal.)

When installing appliance with sliding drawer, swinging or drop-down door directly across from obstructions, provide sufficient clearance for drawer extension or door swings.

When installing appliance with sliding drawer or drop-down door adjacent to wall, cabinet, or other obstruction that extends beyond front edge of appliance, allow 2” minimum clearance between drawer or door and obstruction.
Use these dimensions and clearance instructions for planning purposes only. For detailed installation instructions, refer to installation guide, packed with product, or on the web at frigidaire.com.

**General Installation Guidelines**

**Top**
- 24" Cabinet
- 24" Cabinet
- 25" Counter Top
- 12" Cabinet

*When installing French door refrigerator adjacent to wall, cabinet or another appliance that extends beyond front edge of unit, 20" minimum clearance recommended to allow for optimum 120° to 180° door swing, providing complete drawer/crisper access and removal. (Absolute 4-1/2" minimum clearance will only allow for 90° door swing which will provide limited drawer/crisper access with restricted removal.)*

**Front**
- 24" Cabinet
- 25" Counter Top

*When installing appliance with sliding drawer, swinging or drop-down door directly across from obstructions, provide sufficient clearance for drawer extension or door swings.*

*When installing appliance with sliding drawer or drop-down door adjacent to wall, cabinet, or other obstruction that extends beyond front edge of appliance, allow 2" minimum clearance between drawer or door and obstruction.*
