MORE EASY-TO-USE FEATURES

PowerPlus™ 4-Speed Fan
Over-the-range microwave doubles as a hood and offers 4 levels of ventilation depending on your needs — turbo, high, medium and low. The fan is capable of moving up to 400 cu. ft. of air per minute.

PowerBright™ Interior LED Light
See the power. See the results in action. LED interior microwave light stays on while your dish cooks.

Adjustable Timer
Now you can adjust the cooking time of your dish while it’s cooking. The adjustable timer allows you to add or remove 5 seconds on the timer.

SIGNATURE FEATURES

Effortless Clean™ Interior
Easily wipe away and clean spills from your microwave with the Effortless Clean™ interior surface.

PowerBright™ Cooktop LED Light
Make meal preparation and cooking simple with LED lighting that offers a clear, bright view of your cooktop.

PowerSense™ Cooking Technology
Results you can trust. PowerSense™ Cooking Technology automatically senses ideal time and power levels.

Smudge-Proof™
Resists fingerprints and cleans easily.

INSTALLATION SPECIFICATIONS

- Product Shipping Weight (approx.) - 81 Lbs.
- Voltage Rating - 120V/60 Hz/15 Amps
- Connected Load (kW Rating) @ 120 Volts = 1.6 kW
  (For use on adequately wired 120V, dedicated circuit having 2-wire service with a separate ground wire. Appliance must be grounded for safe operation.)
- Amps @ 120 Volts = 15 Amps
- Always consult local and national electric codes.
- Grounded outlet should be located inside upper cabinet, with hole in base to route power cord. Carefully follow top template instructions for power cord clearance when installing beneath smooth, flat cabinets.
- Microwave's exhaust ventilation system is preset to recirculate air inside with no ducting system required. Exhausting air outside is optional, using either vertical or horizontal ducting system. (Refer to Ducted Option Specifications for outside ventilation.)
- For safe and proper installation, microwave MUST be mounted to BOTH a top cabinet AND a wall, and connected to at least one wall stud. Can NOT be installed in island or peninsula cabinet arrangements.
- Cabinet MUST be capable of supporting a total load of 135 lbs.
- Cabinet bottom MUST be level to ensure proper installation.
- If the cabinet depth (including the cabinet doors) is more than 13” then the unit must be spaced out from the wall using adequate materials supporting 150 lbs. to allow proper top vent air exhaust.
- Filler blocks recommended for installation when cabinet front hangs below recessed bottom shelf.
- Minimum distance of 30” required from cooking surface to bottom edge of top cabinet.
- Minimum distance of 66” required from floor to top of microwave.
- Opening between cabinets MUST be 30” wide and free of obstructions. For openings up to 36” wide, order optional 36” Filler Panel Kit to fill in gap between unit and cabinets.
- Allow 26” minimum clearance for 90° door swing.

DUCTED OPTION SPECIFICATIONS

- For outside ventilation.
- Exhaust duct adapter will be needed for outside ventilation, to mate with standard 3-1/4” x 10” rectangular duct. If round duct required, rectangular-to-round transition adapter will be needed with no less than 6” diameter. For most efficient airflow exhaust, use a straight run or as few elbows as possible with a maximum duct length of 3-1/4” x 10” rectangular or 6” diameter round duct, not to exceed 120 equivalent feet.
- For horizontal installation, be sure to allow enough space between wall studs to accommodate exhaust.
- Refer to installation instructions on web for detailed duct preparation and converting exhaust vent blower system for exterior exhaust ventilation.

OPTIONAL ACCESSORIES

- 36” Stainless Steel Filler Panel Kit - (PN# MWFILKTSS).

Note: For planning purposes only. Always consult local and national electric, gas and plumbing codes. Refer to Product Installation Guide for detailed installation instructions on the web at frigidaire.com.
