INSTALLATION SPECIFICATIONS

- Product Shipping Weight (approx.) - 83 Lbs.
- Voltage Rating - 120V/60 Hz/15 Amps (maximum 20 Amps if connected with disposer)
- Connected Load (kW Rating) @ 120 Volts = 1.44kW
  (For use on adequately wired 120V, dedicated circuit having 2-wire service with a separate ground wire. Appliance must be grounded for safe operation.)
- Amps @ 120V = 10 Amps
- Always consult local and national electric & plumbing codes.
- Meets requirements of ASSE 1006 — integral air gap on supply.
- Water Pressure - Hot water line to dishwasher must provide between 20 and 120 pounds per square inch (psi) with at least 120°F hot water temperature.
- Make sure location has correct drain, water and electrical outlets to make connections — MUST be confined to shaded areas.
- Electrical and water supplies should enter cabinet opening on floor, or through back or side walls, as shown in shaded areas.
- If connecting drain hose to sink trap, local code may require installation of Air Gap Kit (not included).
- Leveling legs supplied to adjust height.
- When installing adjacent to wall, cabinet or other obstruction that extends beyond front edge of unit, allow 2" minimum clearance between opened door and obstruction.
- Floor should be flat and free of obstructions with carpet removed to provide motor clearance.
- When installing at end of cabinet line, sides and back must be fully enclosed.
- Do not install unit under a cooktop, damage will occur.
- Recommended to seal cabinets, enclosing all sides of dishwasher, including underside of countertop, with oil-based paint or moisture-proof polyurethane to prevent possible steam/moisture damage.

Note: For planning purposes only. Always consult local and national electric, gas and plumbing codes. Refer to Product Installation Guide for detailed installation instructions on the web at frigidaire.com.
