Register Your Product
The self-addressed PRODUCT REGISTRATION CARD should be filled in completely, signed and returned to Electrolux Home Products.

This Use and Care Guide provides operating instructions for your model. Use your appliance only as instructed in this Use and Care Guide.

Read and Save These Instructions
This Owner’s Guide provides specific operating instructions for your model. Use your appliance only as instructed in this guide. These instructions are not meant to cover every possible condition and situation that may occur. Common sense and caution must be practiced when installing, operating, and maintaining any appliance.

Record Your Model and Serial Numbers
Record the model and serial numbers in the space provided below.

Model Number: ____________________________
Serial Number: ____________________________
Purchase Date: ____________________________

Important Safety Instructions

For your safety

- Do not store or use gasoline or other flammable vapors and liquids in the vicinity of this unit or any other appliance. Read product labels for flammability and other warnings.
- Do not operate the unit in the presence of explosive fumes.
- Remove and discard any spacers used to secure the shelves during shipping. Small objects are a choke hazard to children.
- Remove all staples from the carton. Staples can cause severe cuts, and also destroy finishes if they come in contact with other appliances or furniture.
**IMPORTANT SAFETY INSTRUCTIONS**

**WARNING**

**Child Safety**
- Destroy carton, plastic bags, and any exterior wrapping material immediately after the unit is unpacked. Children should never use these items for play. Cartons covered with rugs, bedspreads, plastic sheets or stretch wrap may become airtight chambers and can quickly cause suffocation.
- An empty, discarded icebox, refrigerator, or freezer is a very dangerous attraction to children.
- Remove the door(s) of any appliance that is not in use, even if it is being discarded.

**WARNING**

**Risk of child entrapment**

Child entrapment and suffocation are not problems of the past. Junked or abandoned appliances are still dangerous – even if they will sit for “just a few days”. If you are getting rid of your old appliance, please follow the instructions below to help prevent accidents.

We strongly encourage responsible appliance recycling/disposal methods. Check with your utility company or visit www.recyclemynoldfridge.com for more information on recycling your old appliance.

**Before you throw away your old appliance:**
- Remove door.
- Leave shelves in place so children may not easily climb inside.
- Have the refrigerant removed by a qualified technician.

**WARNING**

Avoid fire hazard or electric shock. Do not use an extension cord or an adapter plug. Do not remove any prong from power cord.

Grounding type wall receptacle

Do not, under any circumstances, cut, remove, or bypass the grounding prong.

Power cord with 3-prong grounded plug
**IMPORTANT SAFETY INSTRUCTIONS**

**WARNING**

**Electrical Information**

These guidelines must be followed to ensure that safety mechanisms in the design of this appliance will operate properly.

- Refer to the serial plate for correct electrical rating. The power cord of the appliance is equipped with a three-prong grounding plug for your protection against electrical shock hazards. It must be plugged directly into a properly grounded three-prong receptacle, protected with a 15-amp time delay fuse or circuit breaker. The receptacle must be installed in accordance with the local codes and ordinances. Consult a qualified electrician. Receptacles protected by Ground Fault Circuit Interrupters (GFCI) are NOT RECOMMENDED. Do NOT use an extension cord or adapter plug.
- If the power cord is damaged, it should be replaced by an authorized service technician to prevent any risk.
- Never unplug the appliance by pulling on the power cord. Always grip the plug firmly, and pull straight out from the receptacle to prevent damaging the power cord.
- Unplug the appliance before cleaning and before replacing a light bulb to avoid electrical shock.
- If voltage varies by 10% or more, appliance performance may be affected. Operating the unit with insufficient power can damage the motor. Such damage is not covered under the warranty. If you suspect your household voltage is high or low, consult your power company for testing.
- To prevent the appliance from being turned off accidentally, do not plug unit into an outlet controlled by a wall switch or pull cord.
- Do not pinch, knot, or bend power cord in any manner.

**WARNING**

**Other Precautions**

- To defrost, always unplug unit first.
- Never unplug the unit by pulling on the power cord. Always grip the plug firmly and pull straight out from the receptacle.
- Turning the control to “OFF” turns off the compressor but does not disconnect power to other electrical components.

**NOTE**

It is very important for your appliance to be level in order to function properly. If the unit is not leveled during installation, the door may be misaligned and not close or seal properly, causing cooling, frost, or moisture problems.

**FIRST STEPS**

This Use & Care Guide provides general operating instructions for your model. Use the unit only as instructed in this Use & Care Guide. **Before starting the unit, follow these important first steps.**

**Location**

Choose a place that is near a grounded electrical outlet.

For the most efficient operation, the appliance should be located where surrounding temperatures will not exceed 110°F (43°C). Models with the electronic temperature control option can be located where the surrounding temperature drops to 0°F (-18°C). Additional compressor heaters are not recommended. Models with electromechanical temperature control should **not** be located where the surrounding temperature drops below 40°F (4°C). These models do not have the automatic freeze control option to prevent refrigerated food from freezing. Allow space around the unit for good air circulation. Leave a 3 inch (75 mm) space on all sides of the unit for adequate circulation.

**Leveling**

The appliance must have all bottom corners resting firmly on a solid floor. The floor must be strong enough to support a fully loaded unit.
To Level Upright Units:

After discarding crating screws, use a carpenter’s level to level the appliance from front-to-back. Adjust the plastic leveling feet in front, ½ bubble higher, so that the door closes easily when left halfway open.

**CAUTION**

To allow door to close and seal properly, **DO NOT** let food packages extend past the front of shelves.

---

Repositioning the Mid-Level Basket (some models):

1. To remove the support-hanging basket, press upward on underside of front of support to release from shelf rod.
2. Rotate front under the shelf, and then slide support-hanging basket forward to remove from back shelf rod.
3. To remove shelf grommet, slide away from wall, then pull from rod.
4. Repeat steps 1-3 for other side.
5. With the shelf installed, press the 2 shelf grommets down onto the rod that is anchored into the appliance wall (located in the back only). Be sure to keep the larger end of the shelf grommets away from the wall.
6. Push the shelf grommets onto the shelf rod until firmly seated.
7. Slide the shelf grommets into the wall grommets already in the unit wall until they are flush.
8. Guide the support-hanging basket underneath the shelf, inserting the slotted end of the support onto the rear shelf rod.
9. Rotate the support-hanging basket up to bring the front end over the front shelf rod. Slide forward to locate front of support-hanging basket over front of shelf rod. Push down on support until it snaps into place.

**To install the handle clips to the basket (some models):**

1. Place the basket on a firm, flat surface.
2. With the narrow side of the handle clip on the inside of the basket, snap the handle clip to the recessed area in the basket.
3. Once the inside surface snaps in place, continue the process by rolling the handle clip slightly outward and pressing down firmly to snap onto the outside surface. If installed incorrectly, the handle clip will not lay flat.
**NOTE**
Your appliance may have some, or all of the features listed below. Become familiar with these features, and their use and care.

**OPTIONAL FEATURES**

**Base Screw**

**Harness Restraint**

**Hinge Screws**

**Wire**

**Door Connector**

**Cabinet Connector**

**Harness Restraint**

**Cool Down Period**
For safe food storage, allow 4 hours for the unit to cool down completely. The appliance will run continuously for the first several hours. Foods that are already frozen may be placed in the freezer after the first few hours of operation. Unfrozen foods should **NOT** be loaded into the freezer until freezer has operated for four (4) hours.

When loading freezer, freeze only three (3) pounds of fresh food per cubic foot of freezer space at one time. Distribute packages to be frozen evenly throughout the freezer. It is not necessary to turn the control knob to a colder setting while freezing food.

**Door Removal**

If door must be removed, unplug the unit.

1. Gently lay appliance on its back, on a rug or blanket.
2. Remove 2 base screws and base panel.
3. Remove wire from clips on bottom of cabinet if required.
4. Unplug connector, if required, by holding the cabinet connector in place, and pulling door connector out. If equipped, pull Harness Retainer from Cabinet.
5. Remove 4 bottom hinge screws.
6. Remove plastic top hinge cover.
7. Remove 2 screws from top hinge.
8. Remove top hinge from cabinet.
9. Remove door and bottom hinge from cabinet.
10. To replace door, reverse the above order and securely tighten all screws to prevent hinge slippage. Harness must be routed as shown in figure.

**TEMPERATURE CONTROL**

**Electromechanical Temperature Control** (some models)

- **Converting Between Refrigerator and Freezer:**
  The convertible model can operate as either a freezer or a refrigerator. The electromechanical temperature control provides this adjustment and is located inside the appliance. The temperature is factory preset to provide satisfactory food storage temperatures. However, the temperature control is adjustable to provide a range of temperatures for your personal satisfaction.

**All Freezer or All Refrigerator Change Modes to Fit Your Needs**

**STEP 1:** Locate the temperature control knob at the bottom of the interior back wall.

**STEP 2:** Turn the knob to the area marked “freezer” or “refrigerator” to select your desired mode.
OPTIONAL FEATURES

STEP 3: Adjust the knob to customize your temperature setting or select * for our recommended setting.

TIP: Change modes a few hours before you need to load up your freezer or refrigerator to allow time for the temperature to stabilize between adjustments.

- **Powering off**: To shut off cooling to the unit, turn the temperature control knob counterclockwise to the OFF position.

**Electronic Temperature Control (some models)**

- **Converting Between Refrigerator and Freezer**: The convertible model can operate as either a freezer or a refrigerator. The selection is made by pressing and holding the minus “-” and “set” buttons on the control panel. The display will indicate whether it is in the refrigerator or freezer mode.

- **Adjusting the Temperature Setting**: The temperature is factory preset to provide satisfactory food storage temperatures. To adjust the temperature setting, press the plus “+” button for warmer temperatures and the minus “-” button for colder temperatures. Allow several hours for the temperature to stabilize between adjustments.

**Automatic Freeze Control**

When in the refrigerator mode the Freeze Control Feature will maintain proper interior refrigerator temperature even when the refrigerator is placed in an area where the surrounding temperature drops to 10°F (-12°C).

**Electronic Temp Alarm**

If a malfunction causes an unsafe temperature inside the freezer, the high temp will display on the control panel and the alarm will sound. To silence the alarm, press the “set” button next to the “alarm off” indicator on the display or any key on the control panel.

**Quick Freeze**

Quick freeze can be enabled by entering into the “options” menu on the control panel and by pressing the “set” button once the indicator is highlighted next to “quick freeze”. The unit will be in quick freeze mode for 72 hours and will show a snowflake indicator on the control panel to indicate that it is in quick freeze mode. To exit quick freeze mode, enter into the options menu on the control panel and press the “set” button once the indicator is highlighted next to “quick freeze,” after which the snowflake indicator will be removed from the control panel. Or quick freeze will end automatically after 72 hours.

**Control lock**

Control lock can be enabled by entering into the options menu on the control panel and by pressing the “set” button once the indicator is highlighted next to “control lock”. A control lock icon will be displayed on the control panel to indicate that the control panel has been locked. To unlock, press and hold the set button for 3 seconds, after which the lock indicator will be removed from the control panel and the control panel has been unlocked.

**Temperature Conversion**

Press and hold both temperature buttons (“+” and “-”) to toggle between °F and °C.

**Power Off**

To shut cooling off to the unit and to turn off the interior lights of the unit, enter into the options menu on the control panel and press and hold the “set” button for 3 seconds once the indicator is highlighted next to “power off”. “Power off” will be displayed on the control panel to indicate that the unit is in the powered off mode. To turn power back on to the unit, press and hold the “set” key for 3 seconds. After which the power off indicator will be removed from the control panel and the set point of the unit will be displayed again.
OPTIONAL FEATURES

Power Fail
If your unit has lost power, the control panel will display “power fail” and the number of hours that your unit has been without power up to a maximum of 50 hrs. The alarm will sound until the condition is acknowledged by pressing the set button or any other button on the control panel.

Door Ajar
If your door has been left open for more than 5 minutes, the control panel will display “door ajar” and will sound an alarm until the door has been closed or any button is pressed on the control panel. If a button on the control panel has been pressed but the door has not been closed, “door ajar” will continue to be displayed on the control panel until the door has been closed.

Sabbath Mode
The Sabbath mode is a feature that disables portions of the appliance and its controls in accordance with observance of the weekly Sabbath and religious holidays within the Orthodox Jewish community.

To turn Sabbath mode on, simultaneously press and hold the “Options” button and “+” button for 5 seconds, after which “Sb” will be displayed on the control panel indicating that the unit is in Sabbath mode. To exit Sabbath mode, press and hold the “Options” button and “+” button for 5 seconds, after which the display will return to displaying the set point of the unit.

In the Sabbath mode, the High Temp alarm is active for health reasons. For example, if the door is left ajar the High Temp alarm is activated. The refrigerator will function normally once the door is closed, without any violation of the Sabbath/Holidays. The High Temp alarm is permitted when cabinet temperature is outside the safe zone for 20 minutes. The alarm silences itself after 10 minutes while the High Temp icon stays lit until the Sabbath mode is exited.

For further assistance, guidelines of proper usage and a complete list of models with the Sabbath feature, please visit the web at http:\\www.star-k.org.

NOTE
While in Sabbath mode, neither the lights nor the control panel will work until Sabbath mode has been deactivated.

The unit stays in Sabbath mode after a power failure recovery. It must be deactivated with the buttons on the control panel.

Power On Light
The Power On Light indicates that the appliance is properly connected to electrical power. The light glows even when the temperature control is turned to OFF. If the light goes out, refer to “Appliance does not run” in the Before You Call section.

Adjustable Interior Shelves
Multi-position adjustable interior shelves can be moved to any position for larger or smaller packages. The shipping spacers that stabilize the shelves must be removed prior to adjusting the shelf location. Move shelf to the right and lift left to move to the desired location.

Packaging Spacer

Door Storage
Door bins, shelves, and racks are provided for convenient storage of jars, bottles, and cans. Frequently used items can be quickly selected.

Some models have door racks or bins that can accommodate gallon-sized plastic drink containers and economy-sized jars and containers.

The dairy compartment, which is warmer than the general food storage section, is intended for short term storage of cheese, spreads, or butter.

Adjustable door bins
Some models have adjustable door bins that can be moved to suit individual needs.

To move door bins:
1. Lift bin straight up.
2. Remove bin.
3. Place bin in desired position.
4. Lower bin onto supports until locked in place.

NOTE
While in Sabbath mode, neither the lights nor the control panel will work until Sabbath mode has been deactivated.
**OPTIONAL FEATURES**

**Crispers (some models)**

The crispers, located under the bottom refrigerator shelf, are designed for storing fruits, vegetables, and other fresh produce. Wash items in clear water and remove excess water before placing them in the crispers. Items with strong odors or high moisture content should be wrapped before storing.

**CARE AND CLEANING**

**CAUTION**

- Damp objects stick to cold metal surfaces. Do not touch interior metal surfaces with wet or damp hands.
- Appliance must be unplugged (to avoid electrical hazard) from power source when defrosting unit.

Convertible model is frost free and will defrost automatically, but should be cleaned occasionally.

**Cleaning the Inside**

Wash inside surfaces of the unit with a solution of 2 tbsp. (25 g) of baking soda in 1 qt. (1 l) warm water. Rinse and dry. Wring excess water out of the sponge or cloth.

Wash the removable parts with the baking soda solution mentioned above or mild detergent and warm water. Rinse and dry. **Never** use metallic scouring pads, brushes, abrasive cleaners, or alkaline solutions on any surface. Do not wash removable parts in a dishwasher.

**Cleaning the Outside**

Wash the cabinet with warm water and mild liquid detergent. Rinse well and wipe dry with a clean soft cloth. Replace parts and food.

Do not use razor blades or other sharp instruments, which can scratch the surface when removing adhesive labels. Any glue left from the tape can be removed with a mixture of warm water and mild detergent, or touch the residue with the sticky side of the tape already removed. **DO NOT REMOVE THE SERIAL PLATE.**

**WARNING**

If leaving door open while on vacation, make certain that children cannot get into the appliance and become entrapped.

**ENERGY-SAVING TIPS**

- The appliance should be located in the coolest area of the room, away from heat-producing appliances or heating ducts, and out of direct sunlight.
- Let hot foods cool to room temperature before placing in the unit. Overloading the unit forces the compressor to run longer. Foods that freeze too slowly may lose quality or spoil.
- Be sure to wrap foods properly and wipe containers dry before placing them in the appliance. This cuts down on frost build-up inside the unit.
- Appliance shelves and baskets should not be lined with aluminum foil, wax paper, or paper toweling. Liners interfere with cold air circulation, making the unit less efficient.
- Organize and label food to reduce door openings and extended searches. Remove as many items as needed at one time, and close door as soon as possible.
NOTE
DO NOT open appliance door unnecessarily if unit is off for several hours.

Vacation and Moving Tips

Short Vacations: Leave the unit operating during vacations of less than three weeks.

Long Vacations: If the appliance will not be used for several months, remove all food and unplug the power cord. Clean and dry the interior thoroughly. To prevent odor and mold growth, leave the appliance door open slightly, blocking it open if necessary.

Moving: Disconnect the power cord plug from the wall outlet. Remove food, defrost, and then clean the unit. Secure all loose items such as base panel, baskets, and shelves by taping them securely in place to prevent damage. In the moving vehicle, secure the appliance in an upright position, and secure to prevent movement. Also protect outside of the unit with a blanket, or similar item.

If a power failure occurs, frozen foods will stay frozen for over 2 days (upright/convertible) or 3 days (chest) if the appliance is kept closed*. If the power failure continues, pack seven or eight pounds of dry ice into the unit every 24 hours. Look in the Yellow Pages under “Dry Ice”, “Dairies”, or “Ice Cream Manufacturers” for local dry ice suppliers. Always wear gloves and use caution when handling dry ice.

If the appliance has stopped operating, see the “Freezer does not run” section in the Avoid Service Checklist section of this use and care guide. If you cannot solve the problem, call an authorized service personnel immediately.

If the unit remains off for several hours, follow the directions above for the use of dry ice during a power failure. If necessary, take the food to a local locker plant until the appliance is ready to operate. Look in the Yellow Pages under “Frozen Food Locker Plants”.

*Average cabinet temperature as tested per AHAM standard HRF-1-2007 Section 7.9 at 70º with door remaining closed.

</table>
Your appliance is covered by a one year limited warranty. For one year from your original date of purchase, Electrolux will pay all costs for repairing or replacing any parts of this appliance that prove to be defective in materials or workmanship when such appliance is installed, used and maintained in accordance with the provided instructions.

**Exclusions**

This warranty does not cover the following:

1. Products with original serial numbers that have been removed, altered or cannot be readily determined.
2. Product that has been transferred from its original owner to another party or removed outside the USA or Canada.
3. Rust on the interior or exterior of the unit.
4. Products purchased “as-is” are not covered by this warranty.
5. Food loss due to any refrigerator or freezer failures.
6. Products used in a commercial setting.
7. Service calls which do not involve malfunction or defects in materials or workmanship, or for appliances not in ordinary household use or used other than in accordance with the provided instructions.
8. Service calls to correct the installation of your appliance or to instruct you how to use your appliance.
9. Expenses for making the appliance accessible for servicing, such as removal of trim, cupboards, shelves, etc., which are not a part of the appliance when it is shipped from the factory.
10. Service calls to repair or replace appliance light bulbs, air filters, water filters, other consumables, or knobs, handles, or other cosmetic parts.
11. Surcharges including, but not limited to, any after hour, weekend, or holiday service calls, tolls, ferry trip charges, or mileage expense for service calls to remote areas, including the state of Alaska.
12. Damages to the finish of appliance or home incurred during installation, including but not limited to floors, cabinets, walls, etc.
13. Damages caused by: services performed by unauthorized service companies; use of parts other than genuine Electrolux parts or parts obtained from persons other than authorized service companies; or external causes such as abuse, misuse, inadequate power supply, accidents, fires, or acts of God.

**DISCLAIMER OF IMPLIED WARRANTIES; LIMITATION OF REMEDIES**

CUSTOMER’S SOLE AND EXCLUSIVE REMEDY UNDER THIS LIMITED WARRANTY SHALL BE PRODUCT REPAIR OR REPLACEMENT AS PROVIDED HEREIN. CLAIMS BASED ON IMPLIED WARRANTIES, INCLUDING WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, ARE LIMITED TO ONE YEAR OR THE SHORTEST PERIOD ALLOWED BY LAW, BUT NOT LESS THAN ONE YEAR. ELECTROLUX SHALL NOT BE LIABLE FOR CONSEQUENTIAL OR INCIDENTAL DAMAGES SUCH AS PROPERTY DAMAGE AND INCIDENTAL EXPENSES RESULTING FROM ANY BREACH OF THIS WRITTEN LIMITED WARRANTY OR ANY IMPLIED WARRANTY. SOME STATES AND PROVINCES DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, OR LIMITATIONS ON THE DURATION OF IMPLIED WARRANTIES, SO THESE LIMITATIONS OR EXCLUSIONS MAY NOT APPLY TO YOU. THIS WRITTEN WARRANTY GIVES YOU SPECIFIC LEGAL RIGHTS. YOU MAY ALSO HAVE OTHER RIGHTS THAT VARY FROM STATE TO STATE.

**If You Need Service**

Keep your receipt, delivery slip, or some other appropriate payment record to establish the warranty period should service be required. If service is performed, it is in your best interest to obtain and keep all receipts. Service under this warranty must be obtained by contacting Electrolux at the addresses or phone numbers below.

This warranty only applies in the USA and Canada. In the USA, your appliance is warranted by Electrolux Major Appliances North America, a division of Electrolux Home Products, Inc. In Canada, your appliance is warranted by Electrolux Canada Corp. Electrolux authorizes no person to change or add to any obligations under this warranty. Obligations for service and parts under this warranty must be performed by Electrolux or an authorized service company. Product features or specifications as described or illustrated are subject to change without notice.
